Datta Sai Battu

Contact:+91-8008553277 | **Email:** dattasaibattu@gmail.com | **LinkedIn:** https://www.linkedin.com/in/datta-sai-battu/

Professional Summary

Results-driven DevOps Engineer with 3+ years of experience automating and optimizing mission-critical infrastructure in the banking and financial services sector. Proven track record of accelerating release cycles by 30%, reducing incident response time by 40%, and maintaining 100% SLA compliance for regulatory and payment systems. Skilled in designing secure CI/CD pipelines, container orchestration with Kubernetes, and Infrastructure as Code on AWS. Passionate about shifting security left and eliminating manual toil through intelligent automation.

Technical Skills

Cloud Platforms:	AWS (EC2, S3, VPC, IAM, EKS, RDS, EBS)
CI/CD & Automation:	Jenkins, GitLab CI, Maven, Git, Control-M, GitOps, ArgoCD
Infrastructure as Code:	Terraform, Ansible, Helm
Containers & Orchestration:	Docker, Docker Compose, Kubernetes (EKS), Blue-Green & Canary Deployments
Monitoring & Observability:	Prometheus, Grafana, ELK Stack, Dynatrace
Security & Compliance:	Trivy, SonarQube, Vulnerability Scanning, IAM Least-Privilege, Image Signing
Operating Systems & DB:	Linux (RHEL, Ubuntu), Oracle SQL, Shell Scripting
Scripting:	Bash.

Professional Experience

DevOps Engineer — *Zensar Technologies* **Mar 2022 – Oct 2025**
Hyderabad, Telangana, India

- **CI/CD Pipeline Automation:** Architected end-to-end Jenkins and GitLab CI pipelines with integrated Trivy and SonarQube security gates; reduced release cycles by **30%** and improved overall security posture by **50%** while meeting strict banking-sector regulatory compliance requirements.
- **Kubernetes Orchestration:** Deployed and managed production AWS EKS clusters supporting Blue-Green and Canary deploy- ment strategies, achieving **zero-downtime upgrades** for mission-critical payment and regulatory applications.
- **Infrastructure as Code:** Designed audit-ready, production-grade Terraform modules for automated, repeatable infrastructure provisioning across AWS environments (EC2, S3, VPC, IAM, EKS), eliminating manual setup errors and improving deployment consistency.
- **Observability & Incident Response:** Engineered monitoring stacks using Prometheus and Grafana with custom alerting dashboards; reduced mean time to resolve (MTTR) P1/P2 incidents by **40%** and maintained a **100% SLA record** across all critical systems.
- **Configuration Management:** Developed Ansible playbooks to standardize RHEL server environments at scale, reducing con- figuration drift by **35%** and enabling consistent, repeatable deployments across development and production environments.
- **Workflow Automation:** Automated **50+ manual operational workflows** using Bash scripting and Control-M job scheduling, reclaiming **15+ engineering hours per week** and reducing human error in production support processes.
- **Container Standardization & Security:** Standardized application environments with Docker and implemented container image signing to enforce **100% compliant** container deployments, strengthening the software supply chain security posture.
- **Cost Optimization:** Analyzed cluster utilization trends via ELK Stack and Grafana dashboards, identifying underutilized resources and delivering measurable infrastructure cost savings while improving application performance.

Education

Bachelor of Technology, Computer Science **Jun 2017 – Aug 2021**
Devineni Venkata Ramana & Dr. Hima Sekhar MIC College of Technology, Vijayawada

Awards & Recognition

Client Recognition Award – Awarded at Zensar Technologies for outstanding contributions to CI/CD automation and infrastructure availability in the banking sector.
